SUMMARY

Data Scientist and Research Engineer with a B.Sc. from **The University of Jordan**. Specialized in developing high-performance analytical solutions and end-to-end full-stack AI applications. Expert in engineering complex deep learning architectures—including hybrid **CNN-LSTM** and **Gated-Inception** models—with a focus on medical computer vision and real-time deployment via **FastAPI** and **Flutter**.

EDUCATION

University of Jordan	Amman, Jordan
• B.Sc. in Data Science , King Abdullah II School of Information Technology Graduated Jan 2026 .	
• Specialized in Computer Vision, Data Engineering, and Deep Learning Model Optimization.	
• International Presenter at the Al Ain University Student Research Conference, UAE (Jan 2026).	

EXPERIENCE

Globitel	Nov 2025 – Dec 2025
• Orchestrated model training on remote machines via Termius to optimize enterprise deep learning services.	
• Engineered automated data preparation pipelines for labeling and organizing datasets into optimized splits.	
• Upgraded classification and emotion detection models, validating performance via Postman API testing.	

PROJECTS

GISLC: Gated-Inception for Skin Lesion Classification	Jan 2026
• Engineered a hybrid Gated-Inception CNN-LSTM model featuring an Adaptive Spatial Gating mechanism.	
• Achieved 99.2% accuracy using a balanced clinical subset, resolving extreme inter-class visual similarities.	
CropEye: Smart Agriculture Assistant	May 2025 – Jan 2026
• Designed a full-stack system using Flutter for image streaming and FastAPI for backend inference.	
• Integrated YOLOv8 for detection and ShuffleNetV2 for mobile-efficient severity classification.	
• Implemented a Gemini-powered LLM assistant to provide farmers with real-time agronomic feedback.	
Heart Disease & Fake News Ensemble Pipelines	2025
• Built a stacked ensemble (XGBoost, CatBoost, SVM) achieving 93.3% accuracy for heart disease prediction.	
• Developed an NLP pipeline with TF-IDF and XGBoost achieving 99.8% accuracy for fake news detection.	

TECHNICAL SKILLS & EXPERTISE

Core Technologies: Python, SQL, NoSQL, TensorFlow, PyTorch, Keras, Spark, Data Engineering.
Full-Stack & Deployment: FastAPI, Flask, Flutter, Google Cloud Platform (GCP), Termius, Postman.
Expertise: Computer Vision, NLP, ETL Pipelines, Emotion Detection, Model Fine-tuning, RAG systems.
Languages: Arabic (Native), English (Fluent).
